## 2. Citations and explanations (Rule 70.7)

The invention relates to a portable measurement instrument, in particular, for use in sport.

The closest prior art appears to be document US-A-6 539 336 (D1), which was cited in the search report. D1 describes a portable measurement instrument, in particular, for use in sport. Said instrument includes a housing provided with a sensor, a receiver, a transmitter and a processing unit. Such devices are intended for one specific use and cannot be put to an alternative use in a different sport. As a result, such devices are very inflexible.

The invention overcomes this lack of flexibility by using a housing that can constitute a relay between a remote detector and a remote display unit carried by a user. These means are implemented in conjunction with the other features in the only independent claim, claim 1, which is a device claim.

No such combination of means is described or suggested in the cited documents.
